

October 11, 2016

Hello everyone,

This is the monthly advisor update of the **AlphaDelta Growth of Dividend Income Class** ("ADGoDIC" or the "Fund") from SciVest Capital Management Inc. (the sub-advisor to the Fund).

Attached is the ADGoDIC Portfolio Disclosure Page. The front-side of the Portfolio Disclosure Page shows all of the current stock holdings of the ADGoDIC, as well as some descriptive, dividend and valuation characteristics for each portfolio holding – plus overall portfolio averages. The back-side of the Page shows a number of relevant pie charts depicting overall ADGoDIC portfolio exposures and characteristics such as sector, market capitalization, dividend yield and dividend growth "bucket" exposures.

As shown on the front of the Portfolio Disclosure Page, **across the Fund's current holdings, the weighted average gross dividend yield is 3.2% per annum with impressive double-digit trailing 1, 3 and 5-year dividend growth rates (12.4%, 17.4% and 20.5%, respectively)**. The 3.2% average dividend yield compares to a portfolio weighted average forward earnings per share yield of 8.3% (**259% dividend coverage**) and forward cashflow yield of 10.9% (**338% dividend coverage**). Regarding valuation, the portfolio weighted **average 12-month forward price-to-earnings ratio is 14.2x** and the average 12-month forward price-to-cash-flow ratio is 10.6x.

As always, the ADGoDIC portfolio is well diversified across sectors and industry groups with **the largest sector allocation (financials ex REITs) currently at 23.0%**. In order of size, we have the following exposures to the Bloomberg defined Sectors (plus REITs): 23.0% Financials, 22.7% Consumer Discretionary, 11.2% Technology, 9.0% Industrials, 8.0% Health Care, 5.2% REITs, 5.2% Materials, 4.8% Energy, 3.5% Consumer Staples, 3.3% Communications, and 0.9% Utilities.

On an individual stock holding basis, we currently hold a **diversified portfolio of 80 equity positions**. In late September we **initiated a new position** in Wells Fargo & Co (WFC). We **did not increase (by more than 0.5%)** any existing positions. During September, we **eliminated no positions** and **did not decrease (by more than 0.5%)** any positions.

We continue to find a preponderance of good value (i.e., "DGARP", or "dividend growth-at-a-reasonable-price") within mid and large capitalization stocks, especially within the Financial Services and Consumer Discretionary sectors. On the other hand, we find that many (lower growth) mega-capitalization, dividend-paying stocks, especially those with relatively low earnings and stock price volatility, have become quite expensive on a relative DGARP basis and quite expensive on a pure relative valuation basis (relative to both each stock's own history, as well as in the cross-section of all stocks). This effect is especially evident within the Consumer Staples sector, but also across many mega-cap stocks (i.e., greater than \$100 billion in size) which pay dividend yields in excess of 2.5% p.a. (e.g., PG, KO, PEP, MCD, MSFT, GE and MMM all now trade at over 20x forward earnings per share). **In addition, many stocks within the Utilities, Telecom and REIT sectors also appear excessively expensive as the**

market has disproportionately gravitated towards lower volatility, higher dividend yielding stocks without discerning valuation and expected growth. Overall, we believe that the “low volatility, dividend stock trade” is ending and a robust rotation into growing dividend stocks, especially DGARP stocks, is imminent as it is one of the few remaining inexpensive segments of the overall stock market.

Since our objective within the ADGoDIC is income/distribution growth, our monthly commentaries focus on growth of dividends amongst Fund holdings as opposed to short-term capital returns. In particular, each month we report those Fund holdings which declared dividend increases during the prior month, as well as those holdings we expect to declare dividend increases in the next month. Recall that one of our fundamental beliefs is that, if we can select stocks which consistently increase their dividends into the future, then price appreciation must eventually follow – that is, long-term price appreciation is a consequence of consistent earnings and dividend growth.

Amongst our current ADGoDIC holdings, **during the month of September 2016 we received three (3) declared dividend increases averaging an announced increase of 12.8% quarter-over-quarter (“QoQ”) and 19.2% year-over-year (“YoY”)**, relative to those already known at the end of the prior calendar month.

| No. | Company Name | Ticker Symbol | Current Ind Div Yld (% p.a.) | QoQ Div Increase (%) | YoY Div Increase (%) | Relative to Expected |
|----------------|-------------------------|---------------|------------------------------|----------------------|----------------------|----------------------|
| 1 | Broadcom Ltd. | AVGO | 1.2 | 2.0 | 21.4 | 😊 |
| 2 | Microsoft Corp | MSFT | 2.7 | 8.3 | 8.3 | 😊😊 |
| 3 | Royal Caribbean Cruises | RCL | 2.6 | 28.0 | 28.0 | 😊😊😊 |
| Average | | | 2.2 | 12.8 | 19.2 | |

Chip maker Broadcom provided yet another quarter-over-quarter dividend increase – its 24th consecutive since beginning to pay a dividend in 2010. While this one was moderate at 2% (a 1 cent per quarter increase), its year-over-year increase is strong at 21.4%. Broadcom trades at a forward P/E of only 13.1x, with an analyst expected long-term forward EPS growth rate of 14.6% p.a., making it an inexpensive growth stock and a solid DGARP stock.

Microsoft continued its winning ways by increasing its dividend by a healthy 8.3% year-over-year, near the top end of our expected 5% to 9% range. While moderately expensive on a forward earnings basis (19.7x), we are quite content with this dividend increase given Microsoft’s stability, quality, size and growth rate.

Last but certainly not least, we were extremely happy with Royal Caribbean’s tremendous 28% year-over-year dividend increase. Last month we had written that, “while we are expecting a meaningful dividend increase of 10% to 15%, we believe that, given the price weakness of the stock this year, company management may signal their optimism regarding the future earnings prospects with an even larger dividend increase.” This is indeed what happened – and Royal Caribbean’s stock price reacted accordingly. Royal Caribbean remains one of our favourite consumer discretionary stocks trading extremely cheaply at 11.5x forward earning per share, with years of expected strong double-digit earnings growth ahead of it (analysts expect forward long-term EPS growth of 18.6% p.a.).

Despite these terrific dividend increases, **during September we experienced our first dividend decrease of the 2016 calendar year** – on September 21, Viacom Inc (VIAB) made a number of (primarily negative) announcements including its plan to cut its dividend by 50%. Viacom owns a number of (generally second

tier) television channels including BET, MTV, Nickelodeon and Spike, as well a movie maker and distributor Paramount. In addition to poor recent business performance, Viacom has suffered from battles among management, shareholders and the controlling shareholders (the Redstone family). While Viacom trades at a reasonable valuation of less than 10x trailing and forward earnings per share, Viacom has now violated our first commandment “thou shall not cut one’s dividend” and will thus be liquidated from our portfolios in due course.

During October 2016, we are expecting at least five (5) dividend increase announcements from our current holdings:

| No. | Name | Ticker Symbol | Current Ind Div Yld (% p.a.) | Est. Announce Date | Est. Div Increase (%) |
|-----|-----------------------------|---------------|------------------------------|--------------------|-----------------------|
| 1 | Abbvie Inc | ABBV | 3.7 | October 31 | 6-10 |
| 2 | Crown Castle Intl Corp | CCI | 4.0 | October 19 | 5-8 |
| 3 | Honeywell International Inc | HON | 2.3 | October 28 | 8-12 |
| 4 | International Paper Co | IP | 3.8 | October 11 | 6-10 |
| 5 | Lincoln National Corp | LNC | 2.1 | October 26 | 10-15 |

This month we are expecting dividend increases from a good mix of companies – pharma, REIT, industrial, packaging, and insurance. In each case we are expecting relatively strong (compared to current dividend yield) dividend increases. Three dividend announcements are particularly interesting – Abbvie reflecting the health of big pharma, Honeywell reflecting the health of big diversified industrials, and International Paper reflecting the health of the US consumer.

Always remember our primary message: **“Growing income”, as opposed to “fixed income”, is the only means of maintaining the purchasing power of your (or your client’s) income stream over the years to come.**

If you would like more information regarding the **AlphaDelta Growth of Dividend Income Class** and its current portfolio (including the up-to-date presentation piece), please feel free to contact me directly or alternatively contact AlphaDelta Management Corp. (www.AlphaDelta.com).

Thank you for your continued interest in the Fund,

John J. Schmitz
