

September 9, 2016

Hello everyone,

This is the monthly advisor update of the **AlphaDelta Growth of Dividend Income Class** (“ADGoDIC” or the “Fund”) from SciVest Capital Management Inc. (the sub-advisor to the Fund).

Attached is the ADGoDIC Portfolio Disclosure Page. The front-side of the Portfolio Disclosure Page shows all of the current stock holdings of the ADGoDIC, as well as some descriptive, dividend and valuation characteristics for each portfolio holding – plus overall portfolio averages. The back-side of the Page shows a number of relevant pie charts depicting overall ADGoDIC portfolio exposures and characteristics such as sector, market capitalization, dividend yield and dividend growth “bucket” exposures.

As shown on the front of the Portfolio Disclosure Page, **across the Fund’s current holdings, the weighted average gross dividend yield is 3.2% per annum with impressive double-digit trailing 1, 3 and 5-year dividend growth rates (13.1%, 17.2% and 20.3%, respectively)**. The 3.2% average dividend yield compares to a portfolio weighted average forward earnings per share yield of 8.2% (**253% dividend coverage**) and forward cashflow yield of 10.9% (**338% dividend coverage**). Regarding valuation, the portfolio weighted **average 12-month forward price-to-earnings ratio is 14.5x** and the average 12-month forward price-to-cash-flow ratio is 10.6x.

As always, the ADGoDIC portfolio is well diversified across sectors and industry groups with **the largest sector allocation (consumer discretionary) currently at 23.7%**. In order of size, we have the following exposures to the Bloomberg defined Sectors (plus REITs): 23.7% Consumer Discretionary, 21.8% Financials, 10.7% Technology, 8.0% Health Care, 7.2% Industrials, 5.3% REITs, 4.9% Energy, 5.3% Materials, 3.6% Consumer Staples, 3.4% Communications, and 0.8% Utilities.

On an individual stock holding basis, we currently hold a **diversified portfolio of 79 equity positions**. During the month of August, we **initiated new positions** in Brookfield Infrastructure (**BIP-U**), Celanese Corp (**CE**), Colony Capital Inc (**CLNY**), Coresite Realty Corp (**COR**), CVS Health Corp (**CVS**), Emera Inc (**EMA**), Extra Space Storage Inc (**EXR**), Kar Auction Services Inc (**KAR**), and Lowe’s Corp (**LOW**). In addition, we **increased (by more than 0.5%)** our existing positions in Amtrust Financial Services (**AFSI**) and J2 Global Inc (**JCOM**). During August, we **eliminated no positions**; although we **decreased (by more than 0.5%)** our positions in Amgen Inc (**AMGN**), DuPont Fabros Technology (**DFT**), Telus Corp (**T**), and United Parcel Service (**UPS**).

We continue to find a preponderance of good value (i.e., “DGARP”, or “dividend growth-at-a-reasonable-price”) within mid and large capitalization stocks, especially within the Financial Services and Consumer Discretionary sectors. On the other hand, we find that many mega-capitalization, dividend-paying stocks, especially those with relatively low earnings and stock price volatility, have become quite expensive on a relative valuation basis (relative to both each stock’s own history, as well as in the cross-section of all stocks) and quite expensive on a relative DGARP basis. This effect is especially evident within the

Consumer Staples sector, but also across many mega-cap stocks (i.e., greater than \$100 billion in size) which pay dividend yields in excess of 2.5% p.a. (e.g., PG, KO, PEP, MCD, MSFT, GE and MMM all now trade at over 20x forward earnings per share). In addition, many stocks within the Utilities and REIT sectors also appear excessively expensive. While the valuations of these types of stocks may continue to expand for some time to come (bubbles by their nature do not predictably unwind), we do believe that some form of relative rotation into mid and large capitalization stocks with strong DGARP characteristics is overdue, and in fact there are a number of signs that this rotation has already begun.

Since our objective within the ADGoDIC is income/distribution growth, our monthly commentaries focus on growth of dividends amongst Fund holdings as opposed to short-term capital returns. In particular, each month we report those Fund holdings which declared dividend increases during the prior month, as well as those holdings we expect to declare dividend increases in the next month. Recall that one of our fundamental beliefs is that, if we can select stocks which consistently increase their dividends into the future, then price appreciation must eventually follow – that is, long-term price appreciation is a *consequence* of consistent earnings and dividend growth.

Amongst our current ADGoDIC holdings, during the month of August 2016 we received five (5) declared dividend increases averaging an announced increase of 6.0% quarter-over-quarter ("QoQ") and 11.1% year-over-year ("YoY"), relative to those already known at the end of the prior calendar month.

No.	Company Name	Ticker Symbol	Current Ind Div Yld (% p.a.)	QoQ Div Increase (%)	YoY Div Increase (%)	Relative to Expected
1	Amtrust Financial Services	AFSI	2.5	13.3	13.3	😊
2	Brinker International Inc	EAT	2.6	6.2	6.2	😢
3	Brookfield Infrastructure	BIP-U	4.8	3.5	11.3	😊
4	J2 Global Inc	JCOM	2.0	3.0	12.2	😐
5	Macquarie Infrastructure	MIC	6.0	4.2	12.6	😊😊
Average			3.6	6.0	11.1	

During August we had expected Monsanto Co (MON) to increase its dividend – it failed to do so, declaring a dividend in-line with the prior four (4) quarters. While Monsanto's earnings are expected to fall this year relative to last year (resuming growth next year), they do have the financial wherewithal to increase their dividend. In fact, Monsanto has been buying back a large number of their own shares – 6.6% of their entire float over the past year. Nevertheless, Monsanto is the subject of a take-over attempt by Bayer AG, and thus we suspect that Monsanto's management is preserving its financial flexibility to either defend against the take-over attempt and/or to maximize the price of a take-over.

Our biggest disappointment last month was Brinker International's (owner of Chili's Grill and Bar restaurants) moderate dividend increase of 6.2% year-over-year. While a respectable dividend increase, we were expecting something higher in the neighbourhood of 10%. Nevertheless, Brinker's recent quarterly earnings report was stronger than expected leading to a good jump in its stock price, and its valuation does remain attractive.

During August we received a strong dividend increase, as expected, of 13.3% from Amtrust Financial Services, a mid-cap specialty insurance company. Similarly, our two (2) infrastructure holdings, Brookfield Infrastructure and Macquarie Infrastructure, announced good quarter-over-quarter dividend increases,

with Macquarie being particularly strong at 4.2% quarter-over-quarter, and 12.6% year-over-year, on a 6.0% yielding stock.

During September 2016, we are expecting at least three (3) dividend increase announcements from our current holdings:

No.	Name	Ticker Symbol	Current Ind Div Yld (% p.a.)	Est. Announce Date	Est. Div Increase (%)
1	International Paper Co	IP	3.6	September 13	6-10
2	Microsoft Corp	MSFT	2.5	September 13	5-9
3	Royal Caribbean Cruises	RCL	2.3	September 14	10-15

While we are only expecting three (3) dividend increase announcements during September, each one will be very interesting. First, International Paper, the large-cap paperboard manufacturer, has performed well over the past six (6) months, yet still yields 3.6% and trades at a modest valuation of 13.5x forward EPS. International Paper is a good reflection of the US consumer, and to a lesser extent the global consumer. Despite modest earnings growth this year, we are looking for a dividend increase of 6% to 10%.

Second, Microsoft has been firing on all cylinders the past couple of years and as a result now trades at a modestly expensive 19.5x forward EPS. We are expecting a moderate dividend increase of 5% to 9% – which would be good for a company of Microsoft's quality, size and growth rate.

Finally, Royal Caribbean Cruises is expected to provide a significant dividend increase. Royal Caribbean is currently one of our favourite consumer discretionary stocks trading extremely cheaply at 10.7x forward EPS and 6.4x forward cash-flow, with years of expected strong double-digit earnings growth ahead of it. While we are expecting a meaningful dividend increase of 10% to 15%, we believe that, given the price weakness of the stock this year, company management may signal their optimism regarding the future earnings prospects with an even larger dividend increase.

Always remember our primary message: **"Growing income", as opposed to "fixed income", is the only means of maintaining the purchasing power of your (or your client's) income stream over the years to come.**

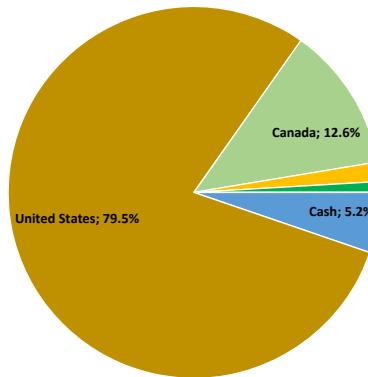

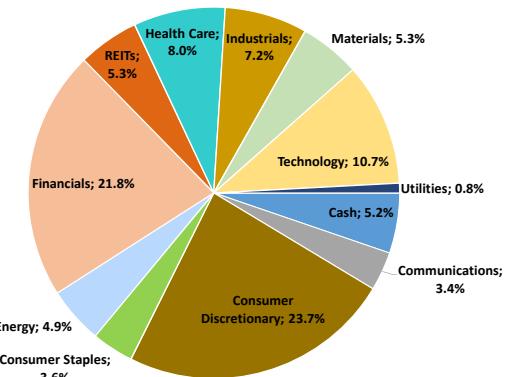

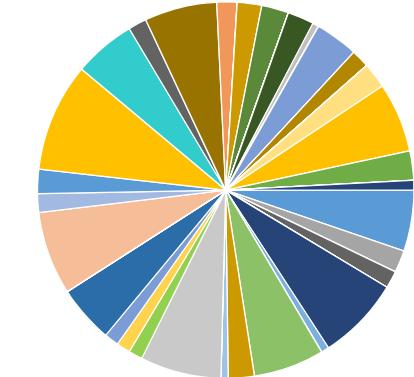

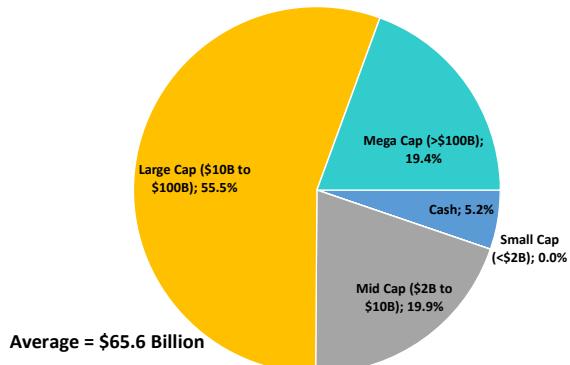

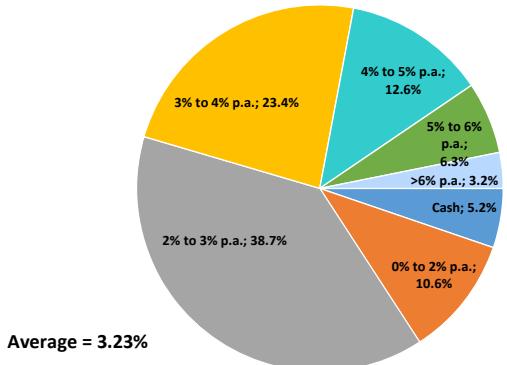

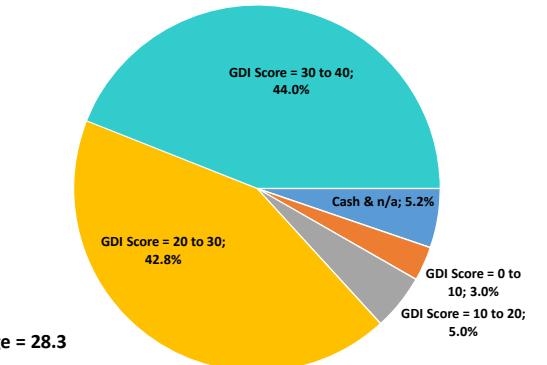

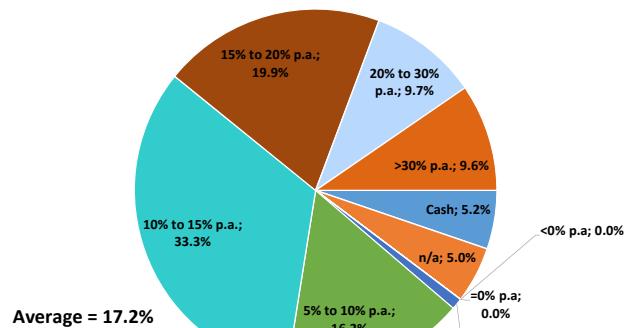

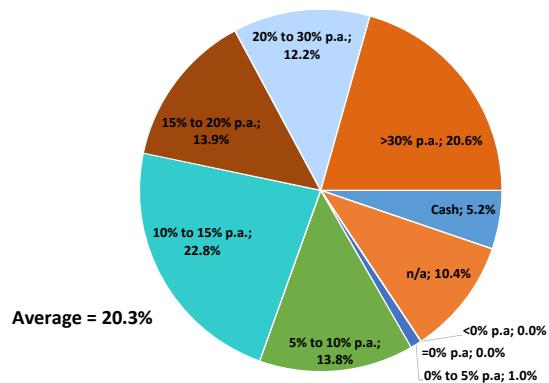

If you would like more information regarding the **AlphaDelta Growth of Dividend Income Class** and its current portfolio (including the up-to-date presentation piece), please feel free to contact me directly or alternatively contact AlphaDelta Management Corp. (www.AlphaDelta.com).

Thank you for your continued interest in the Fund,

John J. Schmitz
